

Flexographic Cleaners

DeepWash CD-102

This product is a very effective cleaner and degreaser for many printing applications. FlexoClean CD-102 contains biodegradable components that efficiently clean waterborne inks from rubber rolls, anilox rolls, printing plates, application rolls, ink pans, hoses and more. CD-102 is ready to use and requires no dilution. (PIF# 02916)

ADVANTAGES

- Safe and easy to use
- Low VOC formula
- Ready to use - requires no dilution step
- Non-toxic, non-flammable and non-corrosive
- Biodegradable and drain safe

DeepWash 312

This concentrated powder is an economical solution for plate and die washing. Designed for use on sensitive photopolymer plates. DeepWash 312 drastically reduces plate degradation and saves money with faster clean-ups. Also works great on anilox rolls, rubber rolls doctor blades and more. (PIF# 01436)

ADVANTAGES

- Reduces plate degradation
- Versatile, multi-use product
- Extra concentrated for maximum economy
- California VOC compliant
- Non-toxic

DeepWash LF-180

The LF-180 is a serious high performance cleaner for flexographic parts washing. This product was formulated using the latest chemical cleaning technology and incorporates active emulsifiers and penetrants for a higher level of clean. The unique combination of chemistry works to lift and solvate the inks and residues from even hard to clean areas. DeepWash LF-180 is a low foaming cleaner which makes it ideal for recirculating tanks and parts washers. (PIF# 02807)

ADVANTAGES

- Biodegradable and drain safe
- Low foaming
- Concentrated
- Non-toxic, non-flammable and non-corrosive
- Low cost per usage

ProWash

ProWash is excellent for cleaning up of solvent based inks on anilox rolls, ink pans, doctor blades and more. The slower evaporation rate makes ProWash great for use in re-circulating tanks and reduces loss to evaporation. ProWash does not have any harsh solvent odors and is practically odorless! ProWash may be rinsed with water and is drain safe. (PIF# 01640)

ADVANTAGES

- Great for recirculation tanks
- California VOC compliant
- No harsh solvent odor
- Non-toxic
- Non-flammable

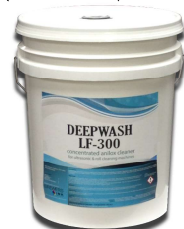

DeepWash LF-300

A concentrated, water based product for cleaning anilox rolls in ultrasonic and automatic roll cleaners. DeepWash LF-300 is an alkaline formula that works on contact to immediately penetrate and lift ink from deep in the cells. LF-300 works great on water borne and UV flexo inks and coatings. This product will also clean just about everything on a press in addition to the anilox. (PIF# 02809)

ADVANTAGES

- Great for machine cleaning applications
- Low foaming
- Highly concentrated formula
- Environmentally safe
- Non-toxic, non-flammable and non-corrosive

Purple Scrub

Purple Scrub is an excellent solution for dirty anilox rolls. Purple Scrub effectively removes water-based, UV and solvent ink residues from anilox roll cells. Purple Scrub does not damage the cell structure on ceramic or chrome cylinders.

ADVANTAGES

- Safe, effective and easy to use
- Stays wet longer and allows product to penetrate & remove dried ink accumulations
- Spreads quickly and easily for better anilox coverage
- Great scent makes product pleasant to work with

SOLVENTS

Kor-Chem carries a line of solvents for use on press and clean up. Solvents are available in 5 gallon pails and 55 gallon drums. Please ask your sales or customer service representative for the current list of solvent products offered.
