

# Specialty Chemicals for Swimming Pools & Spas

## **POW – Granular Alkalinity Increaser**

Easy to use product that raises alkalinity into the proper range, resulting in a more stable pH. Controls staining on pool surfaces and reduces corrosion on equipment.

## **Cal Upper – Granular Water Hardness Regulator**

Increases water hardness level in pools to improve water clarity and prevent corrosion to pool surfaces.

## **pH Lower – Liquid pH Decreaser**

Decreases pool water pH to safe level. Contains water conditioners. Non-hazardous formula.

## **pH Upper – Liquid pH Increaser**

Increases pool water pH to safe levels. Fast acting and easy to use formula.

## **Exact Treat – Non-Foaming Water Conditioner**

A polymeric water conditioner that enhances the natural properties of chlorine & bromine. Softens pool and spa water to help reduce the chlorine demand and pH fluctuations while helping to control stains.

## **Consume – Phosphate Remover**

By using Consume to removes phosphates from the water, water quality and clarity is dramatically enhanced. Consume allows the pool & spa sanitizer to work more effectively.

## **Defend – Salt Cell Protector**

Specially formulated for pools and spas using salt chlorinating systems. Defend is an easy to use, organic product that allows your salt generator and filter to work more efficiently. Using Salt Shield reduces and softens calcium scale to improve the efficiency of your salt cells enhancing chlorine retention resulting in improved water quality.

## **Filter Kleen – Pool Backwashing Agent**

Designed to clean the filtration system by removing oils from sand and diatomaceous earth filters. Filter Clean maximizes the filter efficiency, increases water clarity and decreases the backwash frequency.

## **Metal Out – Metal Stain & Corrosion Control**

Removes metal and leaf stains from pool & spa surfaces without draining water. Also, reduces the calcium levels in pool water.

## **Scum Away – Oil Digesting Liquid Enzyme**

Formulated to eliminate the accumulation of suntan lotions, body oils and hair oils on the water line tile in pools. Use as a weekly maintenance item to prevent build up.

## **Pool Kleen – Swimming Pool Cleaner & Revonator**

A safe, fast and economical method of removing body oils, suntan lotion, film and stains that have been allowed to accumulate during the winter season. Great for use in cleaning the chlorinator and to remove mineral deposits and metal stains from diving boards and ladders.

## **Foam Control – Defoamer for Pools & Spas**

Specifically formulated to disperse and prevent unsightly foam caused from lotions, body oils and more. Instantly disperses the foam and inhibits its reoccurrence.

## **Dazzle – Tile & Grout Cleaner**

A non-hazardous, low pH cleaner that begins to work on contact. Restores and renews tile and grout to a like new appearance.
