

## Floor Care Specialty

# Non-Ammoniated Wax Stripper

## No Rinse Floor Finish Stripper

### DESCRIPTION

Product is a combination of natural and synthetic detergent agents which cleans and acts to dislodge the bond in metal interlock polymers. NA Wax Stripper is a concentrate readily soluble in water. This concentrate also is an excellent cleaner for oily dirt and grime and finds many applications besides stripping for degreasing and cleaning and may be used on any surface not harmed by water.

### DIRECTIONS

1. Sweep or dust mop the floor to remove any debris.
2. Dilute NA Wax Stripper concentrate with cold or warm water. The amount of dilution will depend upon the degree of wax buildup on the floor. **Heavy buildup:** Dilute 20-24 ounces of concentrate to 1 gallon of water. **Medium buildup:** Dilute 10-12 ounces of concentrate to 1 gallon of water. **Light buildup:** Dilute 6-8 ounces of concentrate to 1 gallon of water.
3. Apply liberally with a mop to an area small enough so that product will not dry on floor.
4. After several minutes, agitate the wet section with a mop or machine. Remove liquefied floor finish with a mop, squeegee, wet-vac or automated floor scrubber.
5. Rinse thoroughly with clear water to remove all old floor finish residue, then mop dry.

### ADVANTAGES

- **Fast Acting**
- **Heavy Duty Formula**
- **Concentrated**
- **Non-flammable**
- **Free Rinsing**
- **Easily Emulsifies All Types of Floor Finish**

### RECOMMENDED APPLICATIONS

Linoleum	Ceramic Tile
Asphalt Tile	Concrete
Rubber Tile	Flagstone
Vinyl Tile	Terrazzo

### APPLICABLE FACILITIES

Schools & Daycares	Hospitals
Nursing Homes	Colleges & Universities
Office Buildings	Retail Stores & Outlets
Grocery Stores	Showrooms

### TYPICAL PRODUCT SPECIFICATIONS

Appearance	Colorless liquid
Scent	Unscented
pH	12.5
Weight, per U.S. gallon	8.7 lbs.
Specific gravity	1.04
Viscosity	Water Thin
Foam	Low
Flashpoint	None
Emulsification	Excellent
Rinsability	Excellent
Stability	Excellent
Solubility	Complete
DOT shipping	Non-hazardous
