

Superior Performance for HVAC/R Systems

Key Features:

- Increases Energy Efficiency
- Provides Protection Against Corrosion
- Extends Equipment Life
- Reduces Maintenance Costs
- Designed For All Non-ferrous Metals
- Provides Excellent UV Resistance
- Flexible Coating Does Not Crack
- Easy to Field Apply
- Water-based Formula
- Non-Flammable, Non-Toxic
- Solvent Free

Provides Protection Against:

- Salt Spray
- UV Light
- Water
- Acid Rain
- Bug-Spatter
- Bird Droppings
- Marine Contaminants
- Automobile Emissions
- Acids
- Alkalis
- Chlorine
- Ammonia & Ammonia Salts
- Oxides (Hydrogen, Nitrogen & Sulfur)

Typical Applications:

- Coastal or Marine Environments
- Air Handling Units
- Airports
- Oil Refineries
- Meat & Dairy Processing Plants
- Pulp and Paper Mills
- Sugar Mills and Refineries
- Chemical Plants
- Pharmaceutical Plants
- Manufacturing Plants
- Electricity and Power Plants
- Hog and Mushroom Farms
- Swimming Pool Facilities
- Hotels and Motels
- Restaurants and Bakeries
- Water & Wastewater Treatment Facilities
- Commercial Refrigeration
- Various Other Corrosive Environments
